

Web & email hosting

Industrial strength network, hardware, and team

Tangle Media operates multiple dedicated servers in leading North American data centres. Our data - and yours - lives in the same secure, stable facilities that house some of the Internet's top sites and services. We offer hosting in Canada and the United States.

- **Friendly, local tech support.** You'll never feel like you're just a number. We use modern, high-powered, dedicated servers running the latest software and updates.
- **We limit the number of websites per server.** No overcrowding here. We tightly control the software on our servers to maximize uptime and limit security threats.
- **No set limits on storage or bandwidth.** Use what you need without worrying about running into a limit. We have experience hosting all types of websites. Small business, e-commerce, intranets and more!
- **We tightly control the software on our servers** to maximize uptime and limit security threats.
- We use **modern, high-powered, dedicated servers** running the latest software and updates.

We'll take care of it.

Tangle Media prizes the performance and stability of our product. We provide hosting for our clients so that we can ensure quality and accountability. Tangle Media hosts our data in secure Canadian facilities with dedicated 24/7 staff to ensure uptime, security, availability, and hardware support. Our servers are 100% private and exclusive. We don't host any sites by third parties. Because Tangle Media's approach and CMS is highly integrated with the server, we can ensure excellent technical solutions matched perfectly with server hardware. We pay for servers up to a year in advance at these facilities in order to guarantee continuity for our customers.

The right email plan for your business.

Whether you want just basic email, email with contact and calendar sharing, a dedicated email server, or would rather manage email on your own, we've got a plan that's right for you. We can also work with your existing IT providers to set up a system, specific to the needs of your business.
